

**Due to our current hiring freeze, all positions are presently on hold.**

❖ **Associate Campus Architect**

Be part of UC Irvine's Design & Construction's success! Our capital construction projects currently have a budgeted portfolio of over \$1.3 billion. Our replacement hospital project is the largest construction project in Orange County. We are seeking an experienced Associate Campus Architect to work under the leadership of the Campus Architect, Rebekah Gladson.

The successful candidate will provide management and oversight for architectural and engineering design, oversee bidding, contract execution, and assist with all facets of project delivery for campus construction projects. On behalf of the Campus Architect, oversee financial and business processes, systems, and will participate in strategic and long-range planning for development of future projects, design and implement a communications plan to promote understanding of Design & Construction Services' goals, standards, and accomplishments.

❖ **Director of Quality Assurance**

The Director of Quality Assurance is responsible for quality controls solutions that meet the quality of Design & Construction for a capital expansion program of over \$1 billion at both the campus and medical center. Responsibilities also include supervision of quality assurance staff and management of quality control activities on the University campus and Medical Center's major capital projects. The ideal candidate must possess working knowledge of construction, construction management, contracts, change orders, budgets, bidding process, dispute resolution, arbitration and scheduling.

The Director also develops and implements the quality control direction with Project Managers and inspectors for long-range quality control plans for UCI/UCIMC. The Director's working relationships include: Meeting on a regularly scheduled basis with the Associate Vice Chancellor updating the status of projects currently in design; advising of potential design and control issues, increase cost items and general activities, and assisting Project Managers with quality control issues, Value Engineering, consulting contracts, bidding, bid evaluation, construction contracts, schedules, reviewing of and recommending solutions to construction design problems, and quality issues.

❖ **Manager of Sustainability**

The Manager of Sustainability is responsible for sustainability solutions that meet the quality of Design & Construction for a capital expansion program of over \$1 billion at both the campus and medical center. This position will also manage sustainability criteria for the University Campus and Medical Center's major capital projects regarding Green Building Projects (LEED certification), energy efficiency, and minimal building maintenance for the first 20 years.

The ideal candidate must possess working knowledge of construction, construction management, contracts, change orders, budgets, bidding process, dispute resolution, arbitration and scheduling.

This position develops and implements the sustainability direction with Quality Assurance, Project Managers, Construction / Inspectors for a long-range sustainability program for UCI/UCIMC. The Manager's working relationships include the following:

- The Manager will meet on a regularly scheduled basis with the Associate Vice Chancellor updating the status of projects currently in design; advising of potential design issues, implementation of the sustainability criteria and general activities.
- The Manager will assist Project Managers with quality control issues, Value Engineering, consulting contracts, bidding, bid evaluation, construction contracts, schedules, reviewing of and recommending solutions to construction design problems, and sustainability issues.
- Additionally, the Manager will meet with Facilities Management to assess the long-term results and effectiveness of the University sustainability program and sustainability criteria.

**Application Instructions:** All applications must be submitted on-line. To be considered for employment, you need to apply for a specific job. You can apply on-line by accessing the UCI Human Resources Employment web site at <http://www.hr.uci.edu/employment/>
